

# NGTC-TVI2.0 AES67 Digital Audio Interface

The NGTC-TVI2.0 is a multiformat digital audio interface that converts coaxial or TOSLINK signals to 2 channel audio on AES67.

The nexgentec™ DSP super modules enable efficient design and deployment of NGTC audio network system featuring the highest levels of functionality and performance.

## Key Features

- Coax and SPDIF input
- Downmix to stereo audio
- Supports all audio formats
- LAN AES67 audio port
- PoE powered

## Power and Dimensions

Mains Voltage:	PoE
Power Consumption:	3 Watt
BTU Rating:	BTU / hr
Operation Temperature Range:	5° to 30°C
Dimensions (H x W x D):	25 mm x 75 mm x 110 mm
Weight:	< 0.1 kg
